

What Is Showerex?

A 9kw Power Station under your Shower

Showerex is fuelled by the warm wastewater going down the drain, which instantaneously heats the cold water entering your shower. And amazingly, the dirty water never mixes with the clean water.

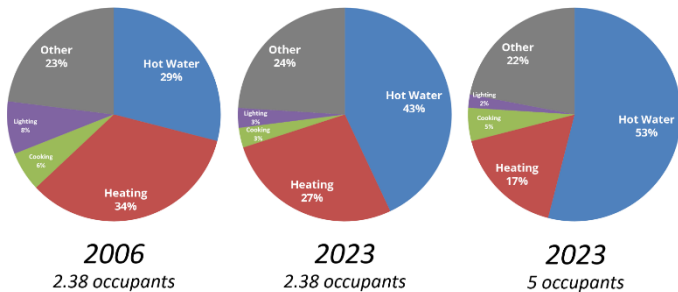

Showerex is a heat exchanger: a smartly engineered copper plumbing pipe with no moving parts, no fans, no pumps, nothing to fail, and no additional maintenance or running costs. Forever saving energy with every shower.

Patented and Proven Technology

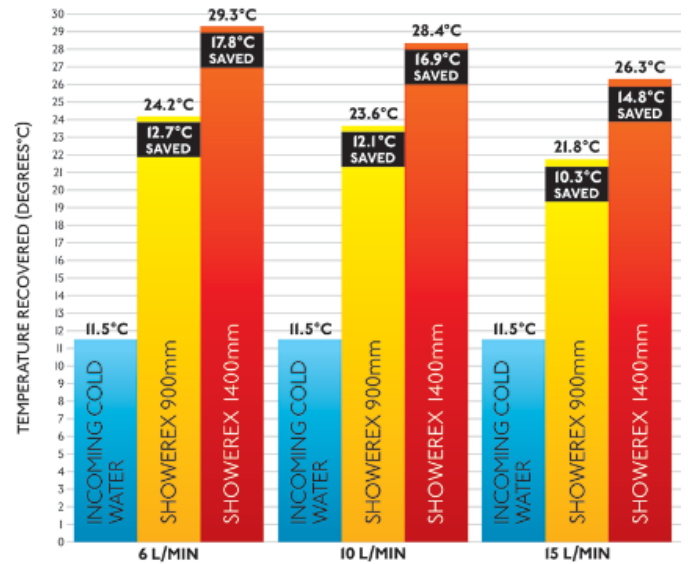

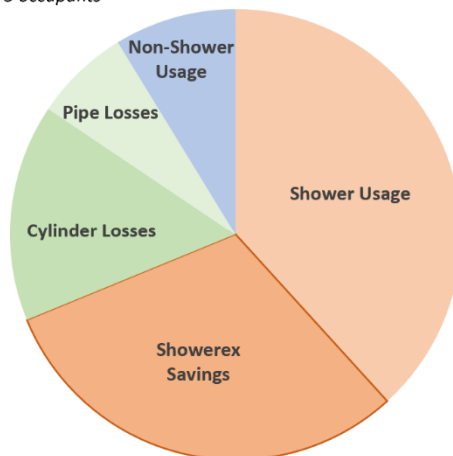

Designed, Researched & Manufactured in Napier

Showerex uses our patented and proven spiral tube technology that global corporations including Zodiac, Rheem, Mitsubishi Electric, and Carrier have licensed from us for hot water heat pumps, solar hot water, wet backs, and numerous other applications.

Hot Water's Increasing Share of Household Energy

As mandatory insulation makes modern homes warmer, the percentage of energy spent heating hot water is increasing and most of the hot water is used showering. By recovering some of this energy with a smart heat exchanger, households can substantially cut their monthly power bills.

Saves Families Hundreds of Dollars Every Year

Choose Showerex and embrace sustainability with an innovative technology designed to save energy and reduce costs. The Showerex solution delivers both immediate and long-term benefits, visit www.showerex.com to calculate how much your family could save every year.

Improves All Hot Water Heating Systems

Every building and home with shower facilities can benefit immensely from installing Showerex as it complements and boosts performance (COP) of all water heating technologies: Electric, Gas, Heat Pump, and Solar.

- **Save Money** – Reduce your energy bills
- **Save Energy** – Lower your energy consumption
- **Save Our Planet** – Reduce your CO2 impact

Made in New Zealand

Showerex is manufactured in Napier by Vaportec NZ, New Zealand's leading manufacturer and designer of high efficiency heat exchangers for over 30 years.

Approved by NZGBC for Homestar v5, Showerex was featured in New Zealand's first 10-star superhome and is now approved for use in all Homestar v5 homes.
